Owner's Guide

The Hair Gallery · thehairgallery.vercel.app

This guide shows you how to run thehairgallery.vercel.app from your phone: log in, handle bookings, close appointments with the price charged, and keep your dates, styles, shop and prices up to date.

1. Getting in

You use the same login page as your clients. The site knows you are the owner and takes you straight to the admin pages.

1. Open **thehairgallery.vercel.app/login.html** and log in with your admin email and password.
2. If 2-step login is on, type the 6-digit code from your authenticator app.
3. You land on the **Dashboard**. Tap **View site** at the top to see what clients see.

Put it on your home screen. On iPhone, open the site in Safari, tap Share, then **Add to Home Screen**. On Android, open it in Chrome, tap the three dots, then **Install app**. It then opens like a normal app.

Forgot your password? On the login page, type your email and tap **Forgot password?**. Open the link in the email and choose a new password of at least 10 characters. Check spam if the email doesn't arrive.

Automatic logout. The admin pages log you out after a while with no activity. This protects your data if you leave your phone open. Just log in again.

2. What clients see and how they book

Clients book themselves, so most of your work is answering enquiries in Instagram DMs and closing appointments afterwards.

1. **Browse.** They see your gallery (with Trending badges), services, price list, policies and shop.
2. **Create an account** with name, phone, email and password, then confirm their email.
3. **Book.** They choose a style, size and length, pick a colour in the colour studio, choose an open date and time, add notes and tick that they agree to your policies.
4. **After booking,** they see your payment details and a button that opens your Instagram DM with their booking details ready to send.
5. **My bookings** shows their history, including the final price once you mark an appointment Done.

To stop spam, each client can have at most **2 upcoming bookings** and **3 open shop requests**. You get an email for every new booking and shop request.

3. Finding your way

On a phone, the 8 pages sit in a bar at the bottom of the screen: swipe it sideways to see them all. On a laptop they are in a sidebar on the left. **Logout** is the last item.

Page	What it's for	Open it when
Dashboard	Money, top styles, trends, busiest days	You want to see how the business is doing
Bookings	Upcoming appointments, closing them, walk-ins	Every day you work
Register	Every appointment and sale ever, searchable, exportable	You need to look something up or back up
Shop	Order requests, products, in-person sales	A client asks for a product or you sell one
Dates	Opening and removing time slots	You plan your next weeks
Styles	Adding, editing and pinning hairstyles	You have a new style or price
Content	Services, price list and policies text	Your prices or rules change
Settings	Instagram, currency, email alerts, payment details, 2-step login	Once at setup, then rarely

4. Dashboard

The Dashboard only counts money you have recorded: appointments marked **Done** with a price, and shop orders marked **Sold**. Close your appointments every day and the numbers stay true.

- **Currency and period pickers (top).** Choose the currency to show and the time range: this month, last 3 months, last 12 months or all time.
- **Summary cards.** Total earned, number of appointments, products sold and similar totals for that period.
- **Revenue by month.** One bar per month. Purple is appointments, gold is products.
- **Top styles.** Your most booked styles and what they earned.
- **Trending now.** Styles booked more in the last 30 days than in the 30 days before. Tap **Pin** to show a Trending badge on that style on your website, and **Unpin** to remove it. Your most-booked styles also get the badge automatically.
- **Best-selling products.** Which oils and products sell most.
- **Busiest days.** Which weekdays get the most bookings, to help you plan your time.

5. Bookings

This is the page you will use most. Close every appointment after it happens so your records and Dashboard stay correct.

Needs closing lists past appointments not yet marked Done or cancelled.

1. Tap **Done** ✓ on the appointment.

2. Type the price charged (normally your listed price; change it only if extras were added) and pick the currency.
3. Add a note if you want (for example "paid cash" or "added beads"), then tap **Save**.

The client then sees the final price in their booking history.

Upcoming shows future appointments with the client's name, phone, style and notes. The notes include their colour studio choice and anything they wrote.

Cancel removes a booking and reopens that time slot so someone else can book it. Use it for no-shows and cancellations.

Add a walk-in or past record is for clients who didn't book on the site. Choose the style, date and client name, type the price and currency, then tap **Save record**. It goes straight into the Register and Dashboard.

6. Register

The Register keeps every appointment and shop order forever, even if a client deletes their account (their name then shows as "Deleted client").

1. Choose **Appointments** or **Product orders**.
2. Optionally set a **From** and **To** date, a status, or type a name or item in the search box.
3. Tap **Search**. Results show 25 at a time; use **Prev** and **Next** to page through.
4. Tap **Edit** on a row to fix a price or note, or **Done** ✓ to close an appointment you missed.
5. Tap **Export CSV** to download the results. It opens in Excel or Google Sheets.

Export a CSV once a month and keep it safe. It is your backup.

7. Shop

Clients send product requests from the site; you arrange payment and pickup in DMs, then mark them Sold here.

Order requests. Tap **Sold** ✓ and type the total price; the stock count goes down automatically. Tap **Cancel** if the client changes their mind.

Add a product. Type the name, a price (leave it blank to show "message us on Instagram"), the stock (leave it blank if you don't count stock), a short description and a photo. Tap **Add product**.

My products.

- **Edit** changes the name, price, description, stock or photo.
- **Hide** takes a product off the website without deleting it; **Show** puts it back.
- **Delete** removes it for good. Past sales stay in the Register.

Record a sale is for products you sell in person. Pick the product, quantity, customer name (optional), total price and currency, then tap **Save sale**.

8. Dates and Styles

Clients can only book times you open, so add dates 2 to 3 weeks ahead.

Dates page

1. Under **Add availability**, pick a date.

2. Type your times separated by commas, for example `9:00 AM, 1:00 PM, 4:00 PM`.
3. Tap **Add**.

Open dates lists every free slot. Tap **×** next to a time to remove it. Booked slots disappear from this list by themselves.

Styles page

- **Add a hairstyle:** type the name and price (leave the price blank to show "Ask on Instagram"), choose a photo, tap **Upload**. Photos up to 5 MB; they are shrunk automatically.
- **Edit** changes the name, price or photo. Renaming a style also updates it in past bookings, so your records stay matched.
- **Pin / Unpin** controls the Trending badge.
- **Delete** removes the style from the website.

9. Content: services, prices and policies

The Content page holds the text of the Services, Prices and Policies sections on your website. Edit the boxes, tap **Save website content**, and refresh the site to see the change.

Each box uses a few simple patterns:

You type	It shows as
`# Braids`	A big heading
`## Knotless`	A group title inside that section
`Small knotless | 25,000 HUF`	A price line: item on the left, price on the right
`Lateness | 15 minutes late means the booking may be cancelled`	A policy: bold title, then its text (Policies box only)
Any other line	A normal line of text

- **Price note** is the small line under the price list (for example "Prices may increase only for extras such as beads, accessories or curls").
- **Policy warning** is the highlighted line under your policies.

Keep the `|` symbol between item and price. If a line looks wrong on the site, check that symbol first.

10. Settings and security

Set these once, then you rarely need this page. Tap **Save** after changing anything.

- **Instagram username (no @).** Every "Chat on Instagram" button on the site uses this.
- **Main currency.** The default currency for prices you record.
- **Email for booking alerts.** Where new booking and shop-request emails go. Tap **Send test email** to check it works, and look in spam the first time. With the current free email plan, alerts can only go to the email the alert account was set up with, so ask Odogwu before changing this.

- **Payment details shown after booking.** The bank, Revolut or Wise details clients see right after they book.

Turn on 2-step login (very important). It stops anyone who learns your password from getting in.

1. Install Google Authenticator or Microsoft Authenticator on your phone.
2. In **Settings**, under Security, tap **Turn on 2-step login**.
3. Scan the QR code with the app.
4. Type the 6-digit code the app shows and tap **Verify & turn on**.

From then on you need your password and a code from the app every time you log in. Never share your password or codes, and use a password you don't use anywhere else.

11. Your routine and quick fixes

A few minutes a day keeps the site accurate and the free hosting awake.

Every day you work

- [ ] Check new bookings in your email and Instagram DMs
- [ ] Mark yesterday's appointments **Done** ✓ with the price, or **Cancel** no-shows
- [ ] Mark shop requests **Sold** ✓ or **Cancel**

Every week

- [ ] Open dates for the next 2 to 3 weeks
- [ ] Update styles, products and prices if anything changed

Every month

- [ ] Look at the Dashboard
- [ ] Export the Register as a CSV and keep it safe

Quick fixes

Problem	What to do
A change doesn't show on the site	Refresh the page, or close and reopen the app
Clients say there are no dates	Add availability on the Dates page
No booking emails	Tap Send test email in Settings and check spam; if it still fails, tell Odogwu
I got logged out	Normal after inactivity; log in again
I lost the phone with my authenticator app	Contact Odogwu to reset your 2-step login
The site is very slow or won't load after a quiet week	The free database sleeps after about a week with no visits; contact Odogwu to wake it
A price line looks wrong	Check the `|` symbol on the Content page

For anything else, message Odogwu.
